

A FREE INTRODUCTION

The Omni-Galactical Order Manifesto

Purpose, principles, and invitation

At its heart, the Order exists to help people live with compassion while remaining free to think for themselves.

A free introduction to a spiritual and creative home built around compassion, independent thought, and the search for meaning.

Our purpose

The Omni-Galactical Order brings spiritual reflection and creative expression together around a practical purpose: to encourage goodness, protect dignity, and help people find connection without surrendering their individuality.

A home for the searching

Founded by author, artist, and musician Zachary Blessing, the Order connects an ethical vision with an expanding world of music, novels, and visual art. It welcomes people who feel drawn to life's deeper questions, including those who have struggled to find a place where their imagination and convictions can coexist.

Our purpose begins with how we treat living beings. Compassion means noticing suffering and responding where we can. Love becomes meaningful through care, patience, and respect. A commitment to truth asks us to examine our own assumptions as honestly as we examine the world around us.

What the name expresses

Our full name is The Interdimensional Omni-Galactical Order of the Divination of G.O.D. Its cosmic language expresses a vision of belonging that reaches beyond borders and familiar categories. It leaves room for spiritual wonder and for the vast imaginative settings explored in our art.

Order speaks to the harmony we seek in our actions and relationships. Divination expresses a search for spiritual understanding and discernment. G.O.D. is the spiritual center of that search: a connection to the divine, approached through goodness and love.

The scale of the name returns to a human responsibility. Whatever we believe about existence, we can choose how we respond to the life directly before us.

The heart of the manifesto

The worth of this vision rests in the care it inspires. We want curiosity to deepen understanding, creativity to offer connection, and conviction to lead to helpful action. These principles are an invitation to reflect and participate freely.

The principles we stand for

These principles describe the character we want the Order to have. Their meaning becomes visible through ordinary choices, especially when kindness or honesty is difficult.

Compassion and the protection of life

We value the well-being of people, animals, and other living beings. We seek to reduce needless suffering and protect those facing cruelty or exploitation. Compassion includes listening carefully, recognizing vulnerability, and offering help within our ability.

Freedom of conscience

Each person remains responsible for their own beliefs and decisions. Questions, disagreement, and a change of mind belong in an honest search for understanding. Participation is voluntary, and personal boundaries deserve respect. No founder or title replaces an individual's conscience.

Dignity and belonging

We judge character through conduct and the care a person shows. Wealth, status, background, and popularity do not measure a person's worth. Belonging should make room for differences without excusing abuse or denying another person's humanity.

Truth and discernment

We pursue truth with curiosity and the willingness to be corrected. We ask what supports a claim, acknowledge uncertainty, and distinguish what we know from what we believe or imagine. A powerful symbol or moving story can inspire reflection while leaving room for careful examination.

Responsibility and justice

We oppose cruelty through protection, accountability, and constructive action. Seeking justice includes attention to evidence and consequences. Our response to wrongdoing should help prevent further harm and support those affected, with the same standards applied to ourselves.

Balance and growth

Life holds change, uncertainty, and the need for stability. We seek a balance that allows imagination to flourish while keeping care and responsibility present. Growth includes admitting mistakes, repairing what we can, and continuing to learn.

Spirituality and creativity

The Order's spiritual foundation and its creative worlds share questions about consciousness, suffering, freedom, and the possibility of goodness. Each gives people a different way to explore those questions.

A personal connection to the divine

We encourage a direct, personal relationship with G.O.D. and the good a person seeks to understand and practice. Reflection, prayer, contemplation, and creative expression can each have a place in that search.

The Order has no required denomination, compulsory creed, or demand to worship its founder. Spiritual connection remains personal. A reader can appreciate the art, explore the philosophy, or share in the conversation while holding their own convictions.

The Living Ghost

The Living Ghost is the musical expression of Zachary Blessing's creative work. Haunting melodies, powerful bass, and cosmic imagery open a space for mystery, resilience, and spiritual reflection. Songs may enter darkness to explore what it feels like to endure, question, and keep searching.

Each listener is free to find their own meaning in the music and its connection to the wider creative world.

The novels and visual art

Through fantasy, science fiction, and cosmic horror, the novels explore encounters with the unknown and the choices people make under pressure. The Observer, the Living Ghost, and fictional portrayals of the Order belong to those imagined worlds. Their conflicts allow questions of power, mercy, and belonging to unfold through story.

The visual art carries related themes through cosmic landscapes, sacred geometry, symbols, and the Grand Seal. Magick and supernatural imagery appear across this creative vocabulary as ways of exploring mystery and transformation.

Room for wonder and clear thinking

Fiction, personal spiritual belief, and scientific knowledge each have their own context. Our stories explore speculative ideas; this manifesto expresses values for daily life. Visitors are welcome to explore both with curiosity and discernment.

What the website offers

The website is the Order's online headquarters: a shared home for its purpose and the creative work associated with it. It is designed to help a newcomer understand the vision and find a path into the work.

Understand the Order

This manifesto introduces the Order's purpose, spiritual orientation, and guiding principles. Alongside the site's introductory material, it gives visitors a starting point for understanding what the name represents and the character the project aims to embody.

Explore the music

The Living Ghost's music is a doorway into the atmosphere and questions of this creative world. Visitors can discover the musical project and follow the listening links and releases presented on the site.

Discover the books and art

The publishing and art areas introduce Zachary Blessing's stories and visual work. Visitors can explore the worlds, themes, and titles presented there and use the available links to continue reading or viewing. Books, music, and artwork may be offered as separate creative works.

Find the community vision

The Realm is the name of the community space within the website's vision. Its purpose is to give readers, listeners, and fellow explorers a place for thoughtful connection. The site will identify the participation features available as that space develops.

The community we seek is grounded in respect. People should be able to ask sincere questions, share interpretations, and disagree without humiliation or harassment. Participation should support a person's life and relationships.

Choose your own way to take part

You can begin by reading a page, listening to a song, or exploring a story. Deeper involvement is a personal choice. The Order's principles call for no compulsory dues, required purchases, or surrender of personal independence.

This manifesto is offered as a free introduction. Purchasing creative work is optional. The website is growing, and its pages are the guide to which releases, resources, and community features are currently available.

An invitation to begin

You do not need a special title or a finished set of answers to begin exploring. Bring your curiosity, your judgment, and your concern for the lives around you.

Put the principles into practice

Begin with something close enough to act on. Listen to someone you might otherwise overlook. Offer practical help where you can. Make room for a sincere question. Create something that gives another person a moment of recognition or hope.

Discernment can be equally practical. Before passing on a claim, ask what supports it. When you make a mistake, acknowledge it and consider what would repair the harm. When a conversation becomes difficult, preserve the other person's dignity along with your own.

A few questions to carry with you

Where can I reduce suffering within my reach? What belief am I willing to examine more carefully? How can I express what matters to me through my actions or creative work? These questions leave each person free to choose a meaningful next step.

A message from the founder

I created the Omni-Galactical Order to bring a vision of goodness and connection into the same home as my work as an author, artist, and musician. I want that home to give people room to imagine, to question, and to recognize the value of compassion in a world that can make it difficult to keep.

The music, the books, and the art are invitations into that vision. What matters most to me is the care we bring back into our lives through it. Explore what speaks to you, keep thinking for yourself, and let your own actions give meaning to what you believe.
